

PRODUCT SPECIFICATION

5mm ROUND RED LED LAMP

DLHI.05MM.R020.R015

Approved By	Checked By	Prepared By

5mm ROUND RED LED LAMP DLHI.05MM.R020.RO15

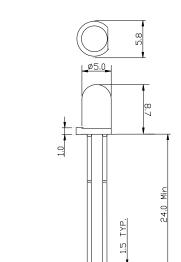

Package Dimensions Features ※ High intensity [∞] Reliable and rugged * Low current requirement [≫] IC compatible 0.1 Description The RED Lamps are made With AlInGaP/Sapphire chip and Water clear epoxy resin. 2.54±0.1 -0.5 SQUARE X 2 -

Dert NO	LED chip		I CI	
Part NO.	Material	Emitting Color	Lens Color	
DLHI.05MM.R020.R015	AlInGaP	DED	Water clear	
	/Sapphire	RED		

Notes:

1. All dimensions in mm tolerance ± 0.2 mm unless otherwise noted.

- 2. An epoxy meniscus may extend about 1.5mm down the lead
- 3. Burr around bottom of epoxy may be 0.5mm max.

5.0mm ROUND RED LED LAMP DLHI.05MM.R020.R015

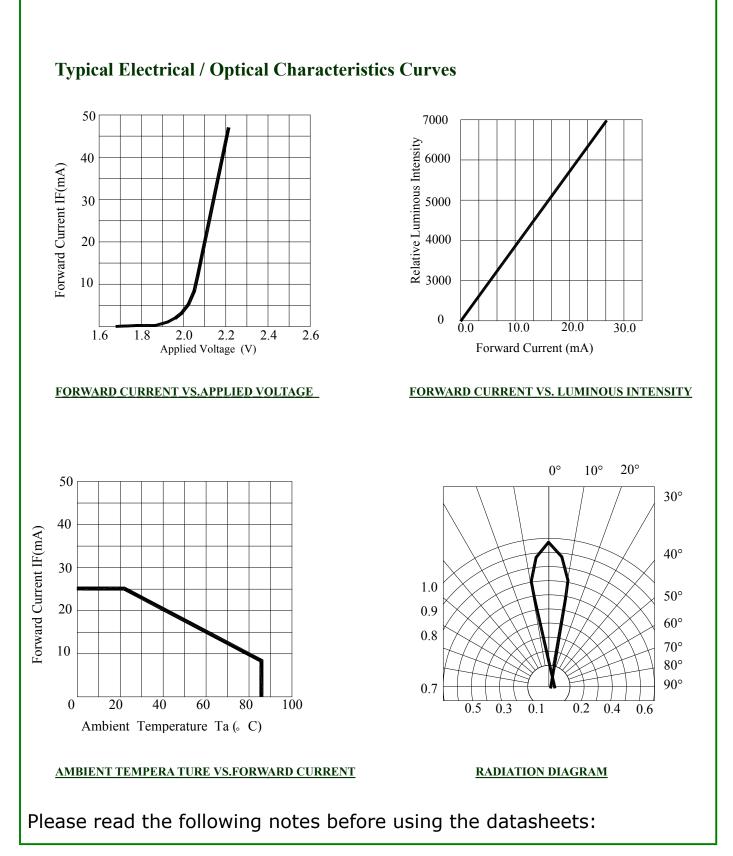

Absolute Maximum Ratings(Ta=25°C)				
Parameter	Symbol	Rating	Unit	
Power Dissipation	PD	80	mW	
Forward Current (DC)	IF	30	mA	
Peak Forward Current(Pulse width≤0.1msec duty≤1/10)	IFP	100	mA	
Reverse Voltage	VR	5.0	V	
Electro-Static-Discharge	ESD	2000	V	
Operation Temperature Range	Topr	-25to+85	°C	
Storage Temperature Range	Tstg	-40to+100	°C	
Lead Soldering Temperature(3.0mm from body) for 5 seconds 2			°C	

Typical Electrical and Optical Characteristics(Ta=25°C)

Parameter	Symbol	Condition	Min.	Тур.	Max.	Unit
Luminous Intensity	Iv	If=20mA	15000		25000	mcd
Forward Voltage	Vf	If=20mA	1.8		2.4	V
Wave length	WLD	If=20mA	620		630	nm
Reverse Current	Ir	Vr=5v			10	uA
Viewing Angle	2 0 1/2	If=20mA		15		deg

5.0mm ROUND RED LED LAMP DLHI.05MM.R020.R015

Date:2019/11/29

Light Emitting Diada

		Light Emitting Diode			
<i>—</i> `,	If you	need pin to be bent because of design:			
	1、	The lead frame can only be bent or cut when it is 3mm or above away from the colloid.			
	2、	The molding of material if needed must be finished before soldering, while molding the			
		PIN is not allowed to be the fulcrum and must be finished by professional with fixture;			
	3、	Lead frame molding must guarantee that the space between lead is same as Circuitry			
		Board			
	4、	High voltage static electricity could be produced while molding the Pin because of			
		vibration friction of machine, so the machine must be reliably grounding (By way of			
		blowing ion fan to eliminate static electricity)			
<u> </u>	Solde	ring Condition:			
	1,	Do not conduct the electricity while soldering the LED			
	2、	Do not forces while the lead are in the heating condition.			
	3、	Max. soldering condition:			
		al soldering: Wave soldering			
		Power of iron: 30 W Highest Warm up temperature: 120°C			
	-	st Temperature: 300 °C Highest Dip soldering temperature 260 °C			
	-	est Soldering time: 3 seconds Longest Dip soldering time: 5 seconds			
		ring position: Dip soldering position:			
		above from the colloid base 3mm above from the colloid base.			
Ξ,		tatic notice :			
	1,	All the LED instrument must be grounding			
	2	All the people, who are possible to touch the LED must wear anti-static wrists and gloves.			
	3	Any LED damaged by static will appear some bad characters, such as , leakage current			
1111	•	increase, Static forward voltage decrease.			
四、	Over current protection:				
	1、	Add protective resistor in series to make it work stable.			
	2	Resistor value formula: R= (VCC-VF) /IF (VCC is power supply voltage, VF is LED			
		drive voltage, IF is forward current.)			
五、		Electrical performance test and application:			
	1,	While testing VF, brightness and wavelength, the current must be set with 20mA; test VR,			
	2	IR must be set with 10uA; Test IR, VR must be set with 5V.			
	2,	Whiling testing and using LED, LED must be provided with the same current and tested			
		by constant current source, and then we can make sure the brightness and consistency of			
	2	other characteristics LED used under the environment temperature between 30° C $\pm 60^{\circ}$ C			
	3、	LED used under the environment temperature between -30 $^{\circ}$ C \sim +60 $^{\circ}$ C			
	4,	When the products are well sorted, please do not use it to the same products with different			
		classes or bag Numbers (Marked in the label), so as to avoid the color and brightness			
		difference. If it is necessary to use with mix bags, please use strictly according to the sequence of bag number. (Not recommended to use like this)			
		sequence of bag number. (Not recommended to use like uns)
